LIST OF SIGNIFICANT HAZARDS

GROUPS AT RISK

EXISTING CONTROLS covered by information held

Overloading	Participants	Operators are instructed to only allow twelve players on at once
Injury caused by boisterous behaviour	Participants	Operators are instructed to segregate older more lively participants from younger less active ones
Fire	Participants Crowd/Operator	Operators to site inflatable away from naked flames and forbid smoking on and around the inflatable
Inflatable tipping over	Participants Crowd	When on grass the inflatable is always pegged, if on concrete adequate sandbags are used to prevent movement
Falling over	Participants	Operators are instructed to tell participants to hold onto their pipe with both hands on top of poles under the webbing loops in front of them at all times
Collision with other players	Participants	Once poles are constructed forwards/ backwards movement will be restricted Any participant persistently pulling against the poles forwards or backwards may be sent off. The operators/referees decision is final
Electric shock	Operator	Electrical units are visually inspected for obvious faults, fused Ext. cables are used and equipment is P.A.T. tested once a year
Excessive Wind	Participants	Check type of soil type under grass - clay has a lot stronger hold than sand Securely double peg all anchor points into the ground if in doubt
	On Grass	All supplied weights to be used and anchor to fixed objects if required. If wind speed exceeds 35km/h on windometer or pegs start to move in the ground or weights start to move when in use, immediately evacuate & deflate until wind has dropped and operator deems appropriate to re-start.
