Participants

EXISTING CONTROLS covered by information held

Operators are instructed to tell participants to remain in the centre of the soft play, until the problem is resolved or the inflatable is safe to walk over.

Operators are instructed to only allow eight participants in the area at once. Operators are instructed to keep each group to similar size & age. Maximum height or age sign also at the entrance.

Whole soft play area is covered by crash mats & if preferred surrounded by an inflatable barrier.

Operators to site inflatable away from naked flames and forbid smoking on and around the inflatable & be aware of extinguisher location. When on grass the inflatable is always pegged, if on concrete adequate sandbags are used to prevent movement.

Electrical units are visually inspected for obvious faults, fused Ext. cables are used and equipment is P.A.T. tested once a year

Participants will be asked to leave in the following cases:

If wind is severe and anchorage points are not enough to secure the inflatable down the inflatable will be deflated until the wind subsides.

If rain is heavier than a light drizzle the inflatable will be deflated and the power supply cut off.

Soft Play Area

Safety Data Sheet

Equipment Required:

	No Req:	In Van:
Inflatable		
1.5 Blower, Extension Lead, Converter		
Petrol Blower & Petrol & pipe
